The European Research Journal

Focus and Scope

The European Research Journal (EuRJ) is an international, independent, peer reviewed, open access and online publishing journal, which aims to publish papers on all the related areas of basic and clinical medicine. Manuscripts must describe original data that has not been published previously nor submitted for publication elsewhere. Manuscripts that adhere to the EuRJ submission guidelines and are deemed appropriate for the scope of the journal are sent to two reviewers who are specialists in the field. The reviewers’ comments are then considered by the members of the EuRJ Executive Editorial Board who discuss the suitability of each submission. The final decision for all submitted manuscripts rests with the Editor-in-Chief.

The journal publishes in the field of original research, case report, reviews and letters to the editor are published only in English.

Editorial Board of the European Research Journal complies with the criteria of the International Council of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), and Committee on Publication Ethics (COPE).

The journal is published three times in a year (March, July and November). No fee is required for publishing the manuscript. No copyright fee is paid to the authors. All articles are detected for similarity.
