Anadolu University Journal of Science and Technology is a international refereed journal which has editorial board consisting of academicians from different disciplines. It is published twice a year since 2000. Since June 2010, Anadolu University Journal of Science and Technology has entered restructuring process in line with recommendations ULAKBİM and to be published in both print and electronic media in three parts; **Anadolu University Journal of Science and Technology-A Applied Sciences and Engineering, Anadolu University Journal of Science and Technology-B Theoretical Sciences and Anadolu University Journal of Science and Technology-C Life Sciences and Biotechnology.**

Manuscripts submitted for publication are analyzed in terms of scientific quality, ethics and research methods in terms of its compliance by the Editorial Board representatives of the relevant areas. Then, the abstracts of the appropriate articles are sent to two different referees with a well-known in scientific area. If the referees agree to review the article, full text in the framework of the privacy protocol is sent. In accordance with the decisions of referees, either directly or corrected article is published or rejected. Confidential reports of the referees in the journal archive will be retained for ten years. All post evaluation process is done electronically on the internet. Detailed instructions to authors are available in each issue of the journal.

## **TOK2016**

### **Special Issue**

Automatic Control National Meeting is held at a different university annually. The 18th of the Automatic Control National Meeting (TOK'2016) was organized by Eskişehir Osmangazi University on September 29-30, 2016. The Turkish National Committee for Automatic Control (TOK), which supports the organization of these scientific meetings, has been a pioneer in the organization of international scientific meetings on behalf of the International Federation of Automatic Controls (IFACs), as well as these national conferences. The objective of TOK is to encourage the progress of institutional and applied systems of automatic control science and technology in all systems and to carry out joint work on this field with all national and international related institutions. TOK supports the various scientific activities in this direction in line with this aim as well as the approval and support to organize any kind of conferences, symposiums, workshops organized by IFAC in our country.

190 papers submitted to the TOK'2016 were evaluated by the referees of the National Science Board and 136 papers were accepted to be presented orally. Accepted papers were presented on September 29-30, 2016 in 5 parallel sessions. Some of the presented papers were chosen, extended, prepared in English, and evaluated by at least two reviewers to be published in TOK 2016 special issue of the Anadolu University Science and Technology Magazine A- Applied Science and Engineering Magazine. We hope that the articles published in this special edition will be useful to scientists, practitioners and student working in the field of automatic control.

We would like to thank the authors, who presented their valuable works in the TOK'2016 special issue and the referees who carefully evaluated the articles. In addition, we thank to Prof. Dr. Aydın Aybar (Vice Rector of Anadolu University), Prof. Dr. Nedim Değirmenci (Anadolu University Science and Technology Magazine Editor) for their supports to create this special issue.
